

1. Record Nr.	UNINA9910454406803321
Autore	Shen Zhongmin <1963->
Titolo	Lectures on Finsler geometry [[electronic resource] /] / Zhongmin Shen
Pubbl/distr/stampa	Singapore ; ; River Edge, NJ, : World Scientific, 2001
ISBN	9786611960650 1-281-96065-9 981-281-162-1
Descrizione fisica	1 online resource (324p.)
Collana	Series on Multivariate Analysis
Disciplina	516.375
Soggetti	Finsler spaces Geometry, Differential Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (p. 299-304) and index.
Nota di contenuto	Finsler Spaces; Finsler m Spaces; Co-Area Formula; Isoperimetric Inequalities; Geodesics and Connection; Riemann Curvature; Non-Riemannian Curvatures; Structure Equations; Finsler Spaces of Constant Curvature; Second Variation Formula; Geodesics and Exponential Map; Conjugate Radius and Injectivity Radius; Basic Comparison Theorems; Geometry of Hypersurfaces; Geometry of Metric Spheres; Volume Comparison Theorems; Morse Theory of Loop Spaces; Vanishing Theorems for Homotopy Groups; Spaces of Finsler Spaces.
Sommario/riassunto	Viewing Finsler spaces as regular metric spaces, this work discusses the problems from the modern metric geometry point of view. It addresses the basics on Finsler spaces, then deals with basic comparison theorems on metrics and measures and their applications to the Levy concentration theory.
