the Devices of the Future Will Be Like

| Sommario/riassunto | In a world that divides us, technology creates connection. Cell phones, e-mail, digital cameras, personal Web sites-they all join us, however tenuously, to what we value. Is connectivity what we're willing to pay for? Should technology be our servant or a tool that helps us do other things? What can we really learn from Napster? What would intelligent standards for touch-screen user interface look like? How does technology evolve, and what drives that evolution? For Dan Bricklin, technology cannot exist independently of the lives and needs of those who use it. For more than a decade he has s |
