

1. Record Nr.	UNINA9910454462203321
Autore	Anderson V. Elving (Victor Elving), <1921->
Titolo	Variables related to human breast cancer [[electronic resource]] : a study from the Dight Institute of Human Genetics // [by] V. Elving Anderson, Harold O. Goodman [and] Sheldon C. Reed
Pubbl/distr/stampa	Minneapolis, : University of Minnesota Press, [1958]
ISBN	0-8166-6117-0
Descrizione fisica	1 online resource (172 pages) : illustrations
Altri autori (Persone)	GoodmanHarold O ReedSheldon C <1910-2003.> (Sheldon Clark)
Disciplina	618.19
Soggetti	Breast - Cancer Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	THE PROBLEM -- THE PROPOSITAE -- THE CONTROL GROUP -- INFORMATION ABOUT RELATIVES -- CANCER IN RELATIVES -- A SECOND SET OF PROPOSITAE -- AN INTERPRETATION OF RESULTS.
Sommario/riassunto	Variables Related to Human Breast Cancer was first published in 1958. The question of what role, if any, heredity plays in the etiology of human cancer is of obvious importance in the continuing search for an answer to the riddle of cancer. This book describes a study which was conducted at the Dight Institute for Human Genetics of the University of Minnesota, seeking evidence on two aspects of the heredity question.
