| Sommario/riassunto      | Provides the chronological overview of the development of the Roman practice - an instruction to forget - from archaic times into the second century CE. This book explores Roman memory sanctions against the background of Greek and Hellenistic cultural influence and in the context of the wider Mediterranean world.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
