

1. Record Nr.	UNINA9910454491803321
Autore	Dukkipati Rao V
Titolo	Analysis and design of control systems using MATLAB [[electronic resource] /] / Rao V. Dukkipati
Pubbl/distr/stampa	New Delhi, : New Age International (P) Ltd., Publishers, c2006
ISBN	1-281-99292-5 9786611992927 81-224-2484-8
Descrizione fisica	1 online resource (269 p.)
Disciplina	629.8
Soggetti	Automatic control Systems engineering Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Cover; Preface; Acknowledgements; Contents; Chapter 1 Introduction to Control Systems; Chapter 2 MATLAB Basics; Chapter 3 MATLAB Tutorial; Bibliography
Sommario/riassunto	Control systems engineering is a multidisciplinary subject and presents a control engineering methodology based on mathematical fundamentals, and stresses physical system modeling. Analysis and design of control systems using MATLAB book is designed as an introductory undergraduate course in control systems for engineering students of all disciplines. The classical methods of control systems engineering are covered here using MATLAB software: matrix analysis, Laplace transforms and transfer functions, root locus analysis and design, frequency response methods of analysis including Bode, Nyq
