| Sommario/riassunto | In a clear and systematic manner, the book presents a holistic exposition of various types of Infrastructural facilities. The focus of this book is on understanding the techno-commercial impact of public systems on overall socio-economic development of the country. The concept and tools relevant for business decision-making in management of public systems have been explained. Restructuring and reform necessary in the management of Infrastructural projects during transition from a planned highly subsidized economy to liberalized deregulated economy have been discussed. The book deals with ident |
