Sommario/riassunto

The Annual Conference of the European Association for Computer Science Logic, CSL 2002, was held in the Old College of the University of Edinburgh on 22–25 September 2002. The conference series started as a programme of International Workshops on Computer Science Logic, and then in its sixth meeting became the Annual Conference of the EACSL. This conference was the sixteenth meeting and eleventh EACSL conference; it was organized by the Laboratory for Foundations of Computer Science at the University of Edinburgh. The CSL 2002 Programme Committee considered 111 submissions from 28 countries during a two week electronic discussion; each paper was refereed by at least three reviewers. The Committee selected 37 papers for presentation at the conference and publication in these proceedings. The Programme Committee invited lectures from Susumu Hayashi, Frank Neven, and Damian Niwinski; the papers provided by the invited speakers appear at the front of this volume. In addition to the main conference, two tutorials – ‘Introduction to Mu- Calculi’ (Julian Bradfield) and ‘Parametrized Complexity’ (Martin Grohe) – were given on the previous day.

Sommario/riassunto

This book brings together research that advances our understanding of the fundamental relationship between board diversity and different aspects of corporate governance, including corporate governance disclosures, board performance, governance characteristics, and ownership structure. The expertly selected chapters deal with related (but not limited) to the following topics: Corporate governance models and diversity; forms of diversity and decisions in the boardroom; Board diversity, corporate disclosure, and intellectual capital disclosures; shareholder activism; differences between private and family firms; Board diversity laws; gender and ethnicity on boards, and going beyond gender aspects of diversity. This book is particularly useful for researchers and practitioner think tanks to understand the state of the art in board diversity research.
