Sommario/riassunto	Since 1978 when it embarked on sweeping agricultural and industrial reforms, China's economic growth has been remarkable. Its success in transforming itself within just three decades from a very poor low-income country to a successful middle-income country is unparalleled. During this period, however, and in contrast to the first 30 years of the People's Republic, progress in the health sector has been disappointing. For example, during the period 1980-2007, China increased its income per head as a percentage of the OECD average from 3 percent to 15 per cent, but infant mortality fell no faster
