Sommario/riassunto

Hardesty and Little provide the most up-to-date guide for assessing the historical significance of archaeological sites that may be eligible to be listed in the National Register of Historic Places. In this second edition, all laws, regulations, and references have been entirely updated. New material on landfills, Japanese internment camps, landscapes, and military properties has been added, along with special case studies on 17th- and 18th-century historical sites and additional chapters on heritage tourism, traditional cultural places, and shipwrecks.
