| Sommario/riassunto      | Aimed at Masters, and PhD students, teachers, researchers and natural resource managers, this book explores the interface between restoration ecology and ecological restoration. Covers both the   |

1.

ecological concepts involved in restoration ecology and their practical applications. Written by an excellent group of ecologists from centres across Europe with a strong reputation for restoration ecology. Only textbook around aimed specifically at advanced undergraduate courses and postgraduate study programmes.
