

1. Record Nr.	UNINA9910454633203321
Autore	Rollinson Hugh R (Hugh Richard), <1949->
Titolo	Early Earth systems [[electronic resource]] : a geochemical approach / / Hugh Rollinson
Pubbl/distr/stampa	Malden, MA, : Blackwell Pub., 2007
ISBN	1-282-11661-4 9786612116612 1-4443-0894-7
Descrizione fisica	1 online resource (296 p.)
Disciplina	551.7
Soggetti	Geochemistry Historical geology Electronic books. Earth Origin Earth Internal structure
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [245]-273) and index.
Nota di contenuto	The Earth system -- The origin and differentiation of the Earth -- The evolution of the Earth's mantle -- The origin of the continental crust -- The origin of the Earth's atmosphere and oceans -- The origin of life.
Sommario/riassunto	Early Earth Systems provides a complete history of the Earth from its beginnings to the end of the Archaean. This journey through the Earth's early history begins with the Earth's origin, then examines the evolution of the mantle, the origin of the continental crust, the origin and evolution of the Earth's atmosphere and oceans, and ends with the origin of life. Looks at the evidence for the Earth's very early differentiation into core, mantle, crust, atmosphere and oceans and how this differentiation saw extreme interactions within the Earth system. Discusses Archaea
