| Autore | Wheelon Albert D (Albert Dewell), <1929-2013, > |
| Titolo | Electromagnetic scintillation . Volume 1 Geometrical optics // Albert D. Wheelon [[electronic resource]] |
| Pubbl/distr/stampa | Cambridge : , : Cambridge University Press, , 2001 |
| ISBN | 1-107-12291-0 0-511-01338-8 1-280-43316-7 9786610433162 0-511-17436-5 0-511-15418-6 0-511-30359-9 0-511-53480-9 0-511-04773-8 |
| Descrizione fisica | 1 online resource (xviii, 455 pages) : digital, PDF file(s) |
| Disciplina | 539.2 |
| Soggetti | Electromagnetic waves - Transmission |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Title from publisher's bibliographic system (viewed on 05 Oct 2015). |
| Nota di bibliografia | Includes bibliographical references and index. |
| Nota di contenuto | 1. Geometrical optics. |
| Sommario/riassunto | Electromagnetic Scintillation describes the phase and amplitude fluctuations imposed on signals that travel through the atmosphere. The volumes that make up Electromagnetic Scintillation will provide a modern reference and comprehensive tutorial, treating both optical and microwave propagation and integrating measurements and predictions at each step of the development. This first volume deals with phase and angle-of-arrival measurement errors, accurately described by geometrical optics. It will be followed by a further volume examining weak scattering. In this book, measured properties of tropospheric and ionospheric irregularities are reviewed first. Electromagnetic fluctuations induced by these irregularities are then estimated for a wide range of applications. The book will be of interest to those working in the resolution of astronomical interferometers and large |

single-aperture telescopes, as well as synthetic aperture radars and laser pointing/tracking systems. It is also directly relevant to those working in laser metrology, GPS location accuracy, and terrestrial and satellite communications.
