

1.	Record Nr.	UNINA9910454669303321
	Autore	Rhodes Jean E
	Titolo	Stand by Me: The Risks and Rewards of Mentoring Today's Youth
	Pubbl/distr/stampa	[Place of publication not identified], : Harvard University Press, 2004
	ISBN	0-674-04268-9
	Soggetti	Social Welfare & Social Work - General Social Welfare & Social Work Social Sciences
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Bibliographic Level Mode of Issuance: Monograph
2.	Record Nr.	UNISA996465871403316
	Titolo	Model driven architecture - foundations and applications : third European conference, ECMDA-FA 2007, Haifa, Israel, June 11-15, 2007 : proceedings / / David H. Akehurst, Regis Vogel, Richard F. Paige (editors)
	Pubbl/distr/stampa	Berlin ; ; Heidelberg : , : Springer, , [2007] Â©2007
	ISBN	1-280-94943-0 9786610949434 3-540-72901-1
	Edizione	[1st ed. 2007.]
	Descrizione fisica	1 online resource (227 p.)
	Collana	Lecture notes in computer science ; ; 4530
	Disciplina	005.1
	Soggetti	Model-driven software architecture Software engineering Object-oriented programming (Computer science)
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.

Nota di bibliografia

Includes bibliographical references and index.

Nota di contenuto

An Open Source Domain-Specific Tools Framework to Support Model Driven Development of OSS -- Efficient Reasoning About Finite Satisfiability of UML Class Diagrams with Constrained Generalization Sets -- A Practical Approach to Model Extension -- Model Transformation from OWL-S to BPEL Via SiTra -- Improving the Interoperability of Automotive Tools by Raising the Abstraction from Legacy XML Formats to Standardized Metamodels -- Templatable Metamodels for Semantic Variation Points -- Execution of Aspect Oriented UML Models -- An Algebraic View on the Semantics of Model Composition -- Towards the Generation of a Text-Based IDE from a Language Metamodel -- Constraints Modeling for (Profiled) UML Models -- Scenarios of Traceability in Model to Text Transformations -- Human Comprehensible and Machine Processable Specifications of Operational Semantics -- Adopting Model Driven Development in a Large Financial Organization -- Reverse Engineering Models from Traces to Validate Distributed Systems -- An Industrial Case Study -- A Model Driven Software Factory Using Domain Specific Languages -- Towards a Model Driven Approach to Automatic BPEL Generation.

Sommario/riassunto

Model-driven architecture, and model-driven approaches in general, holds the promise of moving software development towards a higher level of abstraction. Given the challenges in the software industry of delivering more complex functionality with less effort, it is not really a question whether model-driven development will succeed, but rather a question of when it will break through. However, before this can happen, there are many challenging problems to conquer, both theoretical and pragmatic. This requires close collaboration between academic research and industrial application. The goal of the European Conference on Model-Driven Architecture—Foundations and Applications (ECMDA-FA) is to bring together industry and academia to tackle the problems in model-driven development. This volume includes nine foundation papers and seven application papers. ECMDA-FA 2007 also hosted six workshops on both theoretical and practical aspects of MDA. Furthermore, the keynote speakers, Stuart Kent from Microsoft and Andy Schurr from TU Darmstadt, proved that both industry and academia are interested in MDA and its applications. This third ECMDA-FA conference is the result of the work of the authors who submitted a total of 60 papers, the Program Committee members who produced careful and thoughtful reviews under significant time pressures, the people organizing the workshops, and of course the Steering Committee. Several hundreds of people worked hard to make this conference a success. We have the honor of speaking for all these people in this preface and we would like to thank each of them for their valuable contribution. The ECMDA-FA 2007 conference was supported by the European Commission's Information Society Technologies (IST) initiative and by IBM.
