

1. Record Nr.	UNINA9910454670103321
Autore	Davis Stephen H. <1939->
Titolo	Theory of solidification // Stephen H. Davis [[electronic resource]]
Pubbl/distr/stampa	Cambridge : , : Cambridge University Press, , 2001
ISBN	1-107-11700-3 1-280-42055-3 9786610420551 0-511-17474-8 0-511-15476-3 0-511-32850-8 0-511-54674-2 0-511-05219-7
Descrizione fisica	1 online resource (xiv, 385 pages) : digital, PDF file(s)
Collana	Cambridge monographs on mechanics
Disciplina	530.4/14
Soggetti	Solidification
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	; 1. Introduction -- ; 2. Pure Substances -- ; 3. Binary Substances -- ; 4. Nonlinear theory for directional solidification -- ; 5. Anisotropy -- ; 6. Disequilibrium -- ; 7. Dendrites -- ; 8. Eutectics -- ; 9. Microscale Fluid Flow -- ; 10. Mesoscale Fluid Flow -- ; 11. Phase-Field Models.
Sommario/riassunto	The processes of freezing and melting were present at the beginnings of the Earth and continue to dominate the natural and industrial worlds. The solidification of a liquid or the melting of a solid involves a complex interplay of many physical effects. This 2001 book presents in a systematic way the field of continuum solidification theory based on instability phenomena. An understanding of the physics is developed by using examples of increasing complexity with the object of creating a deep physical insight applicable to more complex problems. Applied mathematicians, engineers, physicists, and materials scientists will all find this volume of interest.
