recognition of deposits as 'income' : U.S. tax law -- Timing of recognition of deposits as 'income' : Israeli tax law -- Timing of recognition of income from deposits : summary and comments -- The deferral approach and the advance approach -- Timing of recognition of income from advances : U.K. tax law -- Timing of recognition of income from advances : U.S. tax law -- Timing of recognition of income from advances : Israeli tax law -- Timing of recognition of income from advances : summary and comments -- The certainty level question and the time gap question -- Timing of deduction of future expenses : U.K.. tax law -- Timing of deduction of future expenses : U.S. tax law -- Timing of deduction of future expenses : Israeli tax law -- Timing of deduction of future expenses : summary and comments -- The comparative value taxation model (the C.V.T. model) -- The saving of financing costs taxation model (the S.F.C. model) -- Selecting one of the two models -- Impact on tax revenues.

Sommario/riassunto

Time itself creates advantages and disadvantages in the field of taxation. The timing of the recognition of income and expenses for tax purposes has two main implications: firstly, for the timing of the collection of tax, and secondly, for the question of quantification, i.e., how to ensure that the difference between the timing of the recognition of income or expenses, as opposed to the respective dates on which the amounts are actually received or paid, does not distort the determination of the amount of chargeable income. The time component is a weapon in the confrontation between
