## Sommario/riassunto

The Fayoum, a large and exceptionally fertile depression in Egypt's Western Desert, some 90 kilometers southwest of Cairo, is a region both rich in history and outstanding in natural beauty. Its historical legacy includes temples, pyramids, and towns from the Middle Kingdom and the Ptolemaic Period, as well as churches, monasteries, and mosques from later times. Neil Hewison here outlines the history (and prehistory) of the Fayoum and its lakes, describes the agriculture and rural life of the region, then guides the visitor around the province site by site, never averse to taking an interesting

3. Record Nr.	UNINA9910779362803321
Autore	Orfield Gary
Titolo	Educational delusions? [[electronic resource] ] : why choice can deepen inequality and how to make schools fair / / Gary Orfield and Erica Frankenberg and associates
Pubbl/distr/stampa	Berkeley, : University of California Press, 2013

## Sommario/riassunto

The first major battle over school choice came out of struggles over equalizing and integrating schools in the civil rights era, when it became apparent that choice could be either a serious barrier or a significant tool for reaching these goals. The second large and continuing movement for choice was part of the very different anti-government, individualistic, market-based movement of a more conservative period in which many of the lessons of that earlier period were forgotten, though choice was once again presented as the answer to racial inequality. This book brings civil rights back into the center of the debate and tries to move from doctrine to empirical research in exploring the many forms of choice and their very different consequences for equity in U.S. schools. Leading researchers conclude that although helping minority children remains a central justification for choice proponents, ignoring the essential civil rights dimensions of choice plans risks compounding rather than remedying racial inequality.
