Sommario/riassunto	Reliable information on how health service strategies affect the poor is in short supply. In an attempt to redress the imbalance, Improving Health Service Delivery in Developing Countries presents evidence on strategies for strengthening health service delivery, based on systematic reviews of the literature, quantitative and qualitative analyses of existing data, and seven country case studies. The authors

also explore how changes in coverage of different health services affect each other on the national level. Finally, the authors explain why setting international targets for health services
