Global warming and corporate disclosures: A comparative analysis of companies from the European Union, Japan and CanadaChapter 6. Social and environmental accounting in North America: A Research Note
Sommario/riassunto	Accounting as an academic discipline has not made any real strides in addressing social and environmental concerns facing this planet. Since the first volume of the series was published in 2000, there have been

no changes in the focus of accounting and it is still taught and practiced in the same way.
