Sommario/riassunto

This book is the first to focus on the African origins of human language. It explores the origins of language and culture 250,000-150,000 years ago when modern humans evolved in Africa. Internationally renowned scholars address the fossil, genetic, and archaeological evidence and critically examine the ways it has been interpreted. - ; This book is the first to focus on the African origins of human language. It explores the origins of language and culture 250,000-150,000 years ago when modern humans evolved in Africa. Scholars from around the world address the fossil, genetic, and archaeological evidence
