**Sommario/riassunto**

This thought-provoking volume presents essays on the foundations of non-equilibrium economics, i.e. the principle of circular cumulative causation (CCC). This work presents empirical research on how the interplay of technology's increasing returns to scale, institutions, resources, and economic policy leads to virtuous circles of economic growth and development, but also to vicious circles of social and ecological degradation. In particular, evidence is provided for the important role of the "development state" and strategic trade policy, economies of large-scale production in manufacturi

| <b>Sommario/riassunto</b>      | The novel follows the lives of several of the schoolboys as they study, take part in their school sports (particularly boxing and running), and enjoy tea in their studies. After the school's sports trophies ('pots' in contemporary slang) are stolen in a burglary, the boys, their masters, and the police join in the hunt for the 'pots'.(Excerpt from Wikipedia) |
