From Reason to History: Savigny's System and the Rise of Social Legal Science -- CHAPTER 7. The Bürgerliches Gesetzbuch (BGB) of 1900: Positive Legal Science and the End of Justice -- Conclusion -- Note on Sources -- Notes -- Index
Sommario/riassunto	Moving from the scientific revolution to the nineteenth-century rise of legal codes, Berkowitz tells the story of how lawyers and philosophers invented legal science to preserve law's claim to moral authority. The "gift" of science, however, proved bittersweet. Instead of strengthening the bond between law and justice, the subordination of law to science

transformed law from an ethical order into a tool for social and economic ends.
