Sommario/riassunto

Destruction of temples and their transformation into churches are central symbols of late antique change in religious environment, socio-political system, and public perception. Contemporaries were aware of these events' far-reaching symbolic significance and of their immediate impact as demonstrations of political power and religious conviction. Joined in any "temple-destruction" are the meaning of the monument, actions taken, and subsequent literary discourse. Paradigms of perception, specific interests, and forms of expression of quite various protagonists clashed. Archaeologists, historians, and historians of religion illuminate "temple-destruction" from different perspectives, analysing local configurations within larger contexts, both regional and imperial, in order to find an appropriate larger perspective on this phenomenon within the late antique movement "from temple to church".

Sommario/riassunto	Hybrid threats posed by various combinations of state and non-state actors have presented considerable transnational challenges to EU-members and NATO-allies. This ongoing rise of hybrid threats, ranging from political instability in Eastern Europe and the Middle East to the resulting mass refugee influx and terrorism in the European neighborhood, stress the need to timely discuss important questions about hybrid threats and the venues for effective Euro-Atlantic cooperation, including post-Brexit policy implications. This edited volume presents comprehensive analyses from various experts.
