Sommario/riassunto	New addition to the ABC series looking at how technology can aid health care This ABC focuses on how patient data, health knowledge, and local service information are managed during the routine tasks that make up clinical work. It looks at medical record keeping, how to use the information that records contain for clinical, quality improvement and research activities, how to use new media to communicate with clinical colleagues and patients, and the availability and uses of clinical knowledge resources. After a short introduction to health informatics, each chapter i
