

1. Record Nr.	UNINA9910455025203321
Titolo	Describing and modeling variation in grammar [[electronic resource] /] / edited by Andreas Dufter, Jurg Fleischer, Guido Seiler
Pubbl/distr/stampa	Berlin ; ; New York, : Mouton de Gruyter, c2009
ISBN	1-282-29657-4 9786612296574 3-11-173774-8 3-11-021609-4
Descrizione fisica	1 online resource (418 p.)
Collana	Trends in linguistics. Studies and monographs, , 1861-4302 ; ; 204
Classificazione	ES 100
Altri autori (Persone)	DufterAndreas FleischerJurg SeilerGuido
Disciplina	417/.2
Soggetti	Language and languages - Variation Grammar, Comparative and general Sociolinguistics Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction / Andreas Dufter, Jurg Fleischer and Guido Seiler -- Parameter-based and minimalist approaches -- Methodological considerations on grammar variation: the right periphery as an OV/VO deciding parameter more so than the left periphery: gradience in the verb cluster / Werner Abraham -- Variation as lexical choice: have, got and the expression of possession / Faye Chalcraft -- Variation in Icelandic morphosyntax / Thorhallur Eythorsson and Johannes Gisli Jonsson -- Constraint-based approaches -- The predicative as a source of grammatical variation / Judith Berman -- Morphological variation: a declarative approach / Martin Neef -- Different notions of variation and their reflexes in Swiss German relativization / Martin Salzmann -- From documentation to grammatical description: prepositional phrases in Ruhrdeutsch / Rene Schiering -- Usage-based, construction-based and statistical approaches -- Can we factor out free choice? / Bert Cappelle -- Empirical syntax: idiolectal variability in

two- and three-verb clusters in regional standard Dutch and Dutch dialects / Leonie Cornips -- Towards a multivariate model of grammar: the case of word order variation in Dutch clause final verb clusters / Gert de Sutter -- Transplanted dialects and language change: question formation in Quebec / Martin Elsigg and Shana Poplack -- Agreement in English dialects / Verena Haser and Bernd Kortmann -- Semi-modal variation / Katarina Klein -- Variation in Komi object marking / Gerson Klumpp -- How lexicalization reflected in hyphenation affects variation and word-formation / Britta Mondorf -- Variation in German adjective inflection: a corpus study / Said Sahel.

Sommario/riassunto

While variation within individual languages has traditionally been focused upon in sociolinguistics, its relevance for grammatical theory has only recently been acknowledged. On the methodological side, there is an ongoing competition between large-scale statistical analyses and investigations that rely more heavily on introspection and elicited grammaticality judgements. The aim of this volume is to bridge the 'cultural gap' between empirical-variationist and formal-theoretical approaches in linguistics. The volume offers case studies that seek to combine corpus-based and competence-based approaches to the description of variation. In doing so, it opens up new avenues for locating and analyzing variability, both at the level of the individual speaker and between speakers of different dialects and generations. The contributions document the plurality of current research into models of grammatical competence that live up to the challenge of variationist data. More specifically, parameter-based (e.g. Minimalist), constraint-based (e.g. Optimality Theoretic), and usage-based (e.g. Construction Grammar) approaches to variation are discussed. The volume therefore is of interest to a broad public within linguistics, including syntacticians of different theoretical persuasion, morphologists and sociolinguists. While a majority of contributions addresses facets of variation in English and German, the volume also includes variationist studies written by specialists of French, Dutch, Icelandic, and Uralic.
