Expand or Break Up the Big Leagues? 20. A Better World for Fans Epilogue: A Performance--Enhancing Law for Sports Acknowledgments Index
Sommario/riassunto	The world of sports seems entwined with lawsuits. This is so, because of two characteristics: sporting contests lose their drama if the competition becomes too lopsided, and the winning athletes and teams usually take the lion's share of attention.

Sommario/riassunto

This seminar volume, edited by Richard C. Barth, Alan R. Roe, and Chorng-Huey Wong, presents an overview of the links between structural and macroeconomic policies that were addressed in an IMF Institute seminar held in Washington, D.C., in 1993. The most important areas of structural reform are covered: the price system, tax and expenditure policy, exchange rate management, external trade, public enterprises, the financial sector, and social safety nets. Four case studies are presented: China, Poland, Argentina, and the Gambia.
