postpartum period / Guy Jackson and Steve Yentis -- Episiotomy and

obstetric perineal trauma / Raneer Thakar and Abdul H. Sultan --

Induction of labour / Devi Subramanian and Leonie Penna -- Preterm

labour and delivery / Sarah L. Bell and Jane E. Norman -- Labour in

women with medical disorders / Mandish Dhanjal and Catherine

Nelson-Piercy -- Management of women with previous caesarean

section / Rajesh Varma and Gordon C.S. Smith -- Rupture of the uterus

/ Nutan Mishra and Edwin Chandrachan -- Management of severe pre-

eclampsia/eclampsia / James J. Walker -- Neonatal resuscitation and

the management of immediate neonatal problems / Paul Mannix.

Sommario/riassunto

An understanding of when and how to intervene is the key to good obstetric care. This textbook is an encompassing reference covering all the essential information relating to childbirth; it offers clear practical guidance on all aspects of labour and delivery. Written by well-known leading experts, each chapter offers a modern authoritative review of best practice. The evidence base described will help to optimize outcome through appropriate clinical management and justifiable intervention. Whilst this is an ideal textbook for those training and taking examinations in labour ward practice, it offers all those caring for the woman in labour a modern, evidence-based approach which will help them understand, recognize and deliver the best possible clinical care. The importance of team working, prioritizing, and the organization of maternity care receive appropriate emphasis with clear guidance and practical advice.
