Since the mid-1970's, however, the urban economy has rapidly deteriorated, leaving workers

scrambling to get by. Expectations of Modernity explores the social and

cultural responses to this prolonged period of sharp economic decline. Focusing on the experiences of mineworkers in the Copperbelt region, James Ferguson traces the failure of standard narratives of urbanization and social change to make sense of the Copperbelt's recent history. He instead develops alternative analytic tools appropriate for an "ethnography of decline. "Ferguson shows how the Zambian copper workers understand their own experience of social, cultural, and economic "advance" and "decline." Ferguson's ethnographic study transports us into their lives-the dynamics of their relations with family and friends, as well as copper companies and government agencies. Theoretically sophisticated and vividly written, Expectations of Modernity will appeal not only to those interested in Africa today, but to anyone contemplating the illusory successes of today's globalizing economy.
