Sommario/riassunto

Offers a fresh perspective on how conversation analysis can be used to highlight the sophisticated nature of what children actually do when interacting with their peers, parents, and other adults. Brings together a contributor team of leading experts in the emerging field of child-focused conversation analytic studies, from both academic and professional research backgrounds. Includes examples of typically developing children and those who face a variety of challenges to participation, as they interact with parents and friends, teachers, counsellors and health professionals. Encompa
