Sommario/riassunto	The essays collected in this volume focus on the role played by the philosophy of the Hellenistic, or post-Aristotelian age (from the school of the successors of Aristotle, Theophrastus and other Peripatetics, Epicurus, Sceptical Academy and Stoicism, to neo-Pythagorenism and the schools of Antiochus and Eudorus) in Philo of Alexandria's works. Despite many authoritative studies on Philo's vision of Greek philosophy as an exegetical tool in allegorizing the Scripture, there is not such a comprehensive overview in Philo's treatises that takes in

account both the progress achieved in the recent interpretation of Hellenistic philosophy and analysis of ancient doxographical literature.

Sommario/riassunto

This book constitutes the proceedings of the Second International Conference on Cloud, Networking for IoT Systems, CN4IoT 2017, and the Second EAI International Conference on ICT Infrastructures and Services for Smart Cities, IISSC 2017, held in Brindisi, Italy, in April 2017. The 26 full papers of both conferences were selected from 39 submissions. CN4IoT presents research activities on the uniform management and operation related to software defined infrastructures, in particular by analyzing limits or advantages in solutions for Cloud Networking and IoT. IISSC papers focus on ICT infrastructures (technologies, models, frameworks) and services in cities and smart communities.
