Disciplina	152.14
Soggetti	Visual perception Ocular Physiological Processes Psychophysiology Movement Perception Arousal Mental Processes Ocular Physiological Phenomena Musculoskeletal Physiological Processes Physiology Behavioral Sciences Musculoskeletal Physiological Phenomena Biological Science Disciplines Behavioral Disciplines and Activities Musculoskeletal and Neural Physiological Phenomena Natural Science Disciplines Eye Movements Attention Neuropsychology Visual Perception Social Sciences Psychology Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph

Sommario/riassunto More than one third of the human brain is devoted to the processes of seeing - vision is after all the main way in which we gather information about the world. This book is unique in focusing on vision as an 'active' process. It goes beyond most accounts of vision where the focus is on seeing, to provide an integrated account of seeing AND looking. Written by two leading vision scientists, this book will be valuable for vision researchers and psychology students, from undergraduate level upwards.

3. Record Nr.	UNINA9910482020703321
