

1. Record Nr.	UNINA9910455121903321
Autore	Janes Rob
Titolo	Metal-ligand bonding [[electronic resource] /] / Rob Janes and Elaine Moore
Pubbl/distr/stampa	Milton Keynes [England], : Open University Cambridge, UK, : Royal Society of Chemistry, 2004
ISBN	1-84755-945-X
Descrizione fisica	1 online resource (112 p.)
Altri autori (Persone)	MooreElaine (Elaine A.)
Disciplina	546.6
Soggetti	Crystal field theory Metal bonding Transition metal complexes Transition metals Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	BK9780854049790-FX001; BK9780854049790-FP001; BK9780854049790-FP003; BK9780854049790-FP005; BK9780854049790-00001; BK9780854049790-00005; BK9780854049790-00014; BK9780854049790-00021; BK9780854049790-00028; BK9780854049790-00033; BK9780854049790-00040; BK9780854049790-00041; BK9780854049790-00044; BK9780854049790-00057; BK9780854049790-00066; BK9780854049790-00070; BK9780854049790-00071; BK9780854049790-00075; BK9780854049790-00083; BK9780854049790-00084; BK9780854049790-00085; BK9780854049790-00087; BK9780854049790-00093; BK9780854049790-00096; BK9780854049790-00097
Sommario/riassunto	To appreciate the chemistry and physical properties of complexes of the transition series, an understanding of metal-ligand interactions applied to complexes of the d-block is needed. Metal Ligand Bonding aims to provide this through an accessible, detailed, non-mathematical approach. Initial chapters detail the crystal-field model, using it to

describe the use of magnetic measurements to distinguish complexes with different electronic configurations and geometries. Subsequent chapters look at the molecular orbital theory of transition metal complexes using a pictorial approach. Bonding in octa
