implementation and evaluation; Chapter 11. Implementation: Michael A. Cucciare; Chapter 12. Evaluation: Kenneth R. Weingardt
Chapter 13. Ethics in technology and mental health: Elizabeth Reynolds Welfel and Kathleen (Ky) T. HeinlenIndex

Sommario/riassunto

The use of technology to provide cost-effective behavioral healthcare is emerging as a crucial aspect of treating a wide variety of behavioral health problems. However, many behavioral health providers lack the knowledge and skills necessary to effectively integrate technology-based behavioral tools into their practice. In *Using Technology to Support Evidence-Based Behavioral Health Practices*, the authors help providers implement technology-based behavioral health practices in various healthcare settings and with various mental health disorders.
