Sommario/riassunto	During the second half of the nineteenth century and the beginning of the twentieth century chemical societies were established all over Europe. The book focuses on this process and further development of the European chemical societies before World War I and in exceptional cases up to 1930. It comprises chapters based on a common set of questions and an extensive concluding chapter that provides a comparative analysis of the early development of the European chemical societies. The book offers unique historical material showing the social, intellectual and political circumstances in which the
