

1. Record Nr.	UNINA9910455237903321
Titolo	Iguanas [[electronic resource]] : biology and conservation // edited by Allison C. Alberts ... [et al.]
Pubbl/distr/stampa	Berkeley, : University of California Press, c2004
ISBN	1-282-35718-2 9786612357183 0-520-93011-8
Descrizione fisica	1 online resource (374 p.)
Altri autori (Persone)	AlbertsAllison
Disciplina	597.95/42
Soggetti	Iguanas Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 303-337) and index.
Nota di contenuto	pt. I. Diversity -- pt. II. Behavior and ecology -- pt. III. Conservation.
Sommario/riassunto	In what is certain to be the key reference on iguanas for years to come, some of the world's leading experts offer a clear and accessible account of the latest research on the evolution, behavioral ecology, and conservation of these highly visible and increasingly endangered creatures, much loved by professional herpetologists and hobbyists alike. The book begins with an introduction by noted iguana biologist Dr. Gordon Burghardt that examines the state of iguana research-past, present, and future-with an emphasis on social behavior. Three major sections follow, each opening with a synthesis by the volume editors, who survey the current status and likely future direction of investigations in the pertinent area. The first section focuses on different aspects of the taxonomic and morphological diversity of iguanas and includes a complete checklist of species. In the second section, contributors address the behavior and ecology of iguanas and provide compelling evidence that both may be far more complex than previously appreciated. The third and final section, highlighting the threats facing iguana populations today, describes the broad array of innovative conservation strategies that will be needed to help ensure their survival. Illustrated throughout with photographs, distribution

maps, tables, and figures, this volume will be the definitive resource for anyone-professional or curious amateur-interested in iguanas.

Sommario/riassunto

Strengthening financial sector regulatory arrangements has been a major focus of the G-20 since the crisis in 2008, and progress in strengthening financial regulations is often cited as its success. Nonetheless, the overall contribution of the G20 as a political forum for the oversight of international financial regulation is dimming as FinTech is blurring the boundaries between intermediaries and markets, as well as between digital service providers moving into the financial space, nonbank financial companies, and banks. Along the same line, financial technology is causing paradigm changes to the traditional financial system, presenting both challenges and opportunities. As FinTech grows rapidly, the importance of regulation and supervision becomes more prominent. The three cornerstones of banking: taking deposits, making loans, and facilitating payments are being reassembled functionally and digitally outside of the bank regulatory perimeter by certain firms. Without comprehensive consolidated supervision, no single regulator can see the whole picture and understand how a firm as a whole operates and takes risk. No crypto firm to date is subject to comprehensive consolidated supervision, creating gaps in supervision alongside risks. Countries around the world are taking divergent views on cryptocurrency and other so-called "Web3" technologies based on blockchain. This book aims to provide a comparison between the various available approaches, models, or legislations by identifying certain key legislative policies within the G-20 as they cope with innovative financial technologies, and will be of interest to scholars, students, and practitioners of banking, financial regulation, risk management, and financial technology. Felix I. Lessambo is Adjunct Associate Professor at Fordham University, USA, where he teaches Corporate Tax and Audit & Assurance Services. He was an Associate Professor at Central Connecticut State University School of Business where he taught Financial Statements Analysis, Global Financial Reporting, and Law & Finance. He has practiced international tax, transfer pricing, and alternative investment management where he structured and advised on hedge funds and private equity cross-border transactions. .
