Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Half-title; Series-title; Title; Copyright; Contents; General editor's preface; Preface; Introduction; CHAPTER 1 The development of Darwinian theory; CHAPTER 2 Moral and metaphysical assumptions; CHAPTER 3 Trying to live in nature; CHAPTER 4 The biology of sin; CHAPTER 5 Human identities; CHAPTER 6 The goals of goodness; CHAPTER 7 The end of humanity; CHAPTER 8 The covenant with all living creatures; CHAPTER 9 Conclusion: cosmos and beyond; Index
Sommario/riassunto	This stimulating and wide-ranging book mounts a profound enquiry into some of the most pressing questions of our age, by examining the relationship between biological science and Christianity. The history of biological discovery is explored from the point of view of a leading philosopher and ethicist. What effect should modern biological theory and practice have on Christian understanding of ethics? How much of

that theory and practice should Christians endorse? Can Christians, for example, agree that biological changes are not governed by transcendent values, or that there are no clear or essential boundaries between species? To what extent can 'Nature' set our standards? Professor Clark takes a reasoned look at biological theory since Darwin and argues that an orthodox Christian philosophy is better able to accommodate the truth of such theory than is the sort of progressive, meliorist interpretation of Christian doctrine which is usually offered as the properly 'modern' option.
