Sommario/riassunto

Such important issues of the modern thought as freedom, will, and action have their roots not only in classical philosophy, but also in early Christian theology. The book aims to fill a gap in our knowledge about the theological roots of the issues mentioned. The author explores Christological contests of the 7th century on the issues of will and actions (energy) in Christ. The main source for the research are the acts of the western and eastern Church councils and writings of the most prominent theologians of the time. The author also thoroughly examines the preceding theological traditions associated with the names of Apollinarius of Laodicea, Theodore of Mopsuestia, Cyril of Alexandria and Severus of Antioch.

Sommario/riassunto	<p>This book constitutes the refereed proceedings of the 6th Workshop on Uncertainty for Safe Utilization of Machine Learning in Medical Imaging, UNSURE 2024, held in conjunction with MICCAI 2024, Marrakesh, Morocco, on October 10, 2024. The 20 full papers presented in this book were carefully reviewed and selected from 28 submissions. They are organized in the following topical sections: annotation uncertainty; clinical implementation of uncertainty modelling and risk management in clinical pipelines; out of distribution and domain shift identification and management; uncertainty modelling and estimation.</p>
