

1. Record Nr.	UNINA9910455325603321
Autore	Flynn James R (James Robert), <1934->
Titolo	What is intelligence? : beyond the Flynn effect // James R. Flynn [[electronic resource]]
Pubbl/distr/stampa	Cambridge : , : Cambridge University Press, , 2007
ISBN	0-511-69941-7 1-107-18413-4 1-282-31801-2 9786612318016 0-511-60525-0 0-511-60465-3 0-511-60412-2 0-511-60495-5 0-511-60334-7 0-511-60256-1
Descrizione fisica	1 online resource (xi, 216 pages) : digital, PDF file(s)
Disciplina	153.9
Soggetti	Intellect
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references (p. 196-209) and indexes.
Nota di contenuto	A bombshell in a letter box -- Beyond the Flynn effect -- Towards a new theory of intelligence -- Testing the Dickens/Flynn model -- Why did it take so long? -- IQ gains can kill -- What if the gains are over? -- Knowing our ancestors -- The art of writing cognitive history -- About GUT : the grand unification theory of intelligence -- Howard Gardner and the use of words.
Sommario/riassunto	The 'Flynn effect' refers to the massive increase in IQ test scores over the course of the twentieth century. Does it mean that each generation is more intelligent than the last? Does it suggest how each of us can enhance our own intelligence? Professor Flynn is finally ready to give his own views. He asks what intelligence really is and gives a surprising and illuminating answer. This expanded paperback edition includes three important new essays. The first contrasts the art of writing

cognitive history with the science of measuring intelligence and reports data. The second outlines how we might get a complete theory of intelligence, and the third details Flynn's reservations about Gardner's theory of multiple intelligences. A fascinating book that bridges the gulf separating our minds from those of our ancestors a century ago, and makes an important contribution to our understanding of human intelligence.
