Sommario/riassunto	This volume is the third of Pierre Rousselot's Philosophical Works. It includes seven essays written between 1908 and 1914, one year before his death (two were published posthumously: "A Theory of Concepts by Functional Unity" and "Idealism and Thomism"). These essays offer a complement to Rousselot's views on epistemology, which he presented in Intelligence and constitute the core of his Neo-thomistic philosophy. However, besides making his views more clear and specific, these essays also go further than what we had in Intelligence. It is an

effort to offer a systematic view on knowledge
