Sommario/riassunto

Uniquely covering literary, visual and performative expressions of culture, this volume aims to correlate the conjunctions of nation building, gender and representation in late 19th and early 20th century China and Japan. Focusing on gender formation, the chapters explore the changing constructs of masculinities and femininities in China and Japan from the early modern up to the 1930's. Chapters focus on the dynamism that links the remodeling of traditional arts and media to the political and cultural power relations between China, Japan, and the Western world. A true tribute to multidisciplinary studies.
