Sommario/riassunto	The military played a pivotal role in the political development, state functions, foreign policy and the daily lives of the people in the Central Asian states from the early twentieth century until the present. This book is the first major, in-depth study of the military institutions in Central Asian states. It examines their hidden story, the different stages of their development from the early twentieth century until the present, and the influence they had on the state and society. It effectively combines history, sociology of the military and political

science and provides deeper insight
