

1. Record Nr.	UNINA9910455382803321
Autore	Herlihy David
Titolo	Medieval households [[electronic resource] /] / David Herlihy
Pubbl/distr/stampa	Cambridge, MA, : Harvard University Press, 1985
ISBN	0-674-03860-6
Descrizione fisica	vii, 227 p. : ill
Collana	Studies in cultural history
Disciplina	306.8/5/094
Soggetti	Families - Europe - History Households - Europe - History Middle Ages Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliography and index.

2. Record Nr.	UNINA9910637709703321
Autore	Wimberger Sandro
Titolo	Nonlinear Dynamics and Quantum Chaos : An Introduction / / by Sandro Wimberger
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2022
ISBN	9783031012495 9783031012488
Edizione	[2nd ed. 2022.]
Descrizione fisica	1 online resource (270 pages)
Collana	Graduate Texts in Physics, , 1868-4521
Disciplina	531 530.12
Soggetti	Nonlinear optics Dynamics Mathematical physics Mechanics Nonlinear Optics Dynamical Systems Mathematical Methods in Physics Classical Mechanics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Introduction -- Dynamical systems -- Nonlinear Hamiltonian systems -- Dissipative systems -- Aspects of quantum chaos -- Index.
Sommario/riassunto	This book presents a clear and concise introduction to the field of nonlinear dynamics and chaos, suitable for graduate students in mathematics, physics, chemistry, engineering, and in natural sciences in general. This second edition includes additional material and in particular a new chapter on dissipative nonlinear systems. The book provides a thorough and modern introduction to the concepts of dynamical systems' theory combining in a comprehensive way classical and quantum mechanical description. It is based on lectures on classical and quantum chaos held by the author at Heidelberg and Parma University. The book contains exercises and worked examples, which make it ideal for an introductory course for students as well as

for researchers starting to work in the field.
