Expanding Opportunities for Democratic Republic of Congo Youth: Promising Avenues; 13. Conclusions and Recommendations
Sommario/riassunto	This study analyzes the current educational attainment and school enrollment status of youth, as well as the formal and informal post-secondary educational and training opportunities available to them. The study uses the results of a simulation model that incorporates enrollment in alternative education programs and considers alternative

scenarios for developing the post-primary sector. Each scenario is evaluated for the impact on the human capital accumulation of young people and the sustainability of public expenditures. The report offers policy options for rapidly raising the educational at
