1.	Record Nr.	UNINA9910455535803321
	Titolo	Econometrics and risk management [[electronic resource] /] / edited by Jean-Pierre Fouque, Thomas B. Fomby, Knut Solna
	Pubbl/distr/stampa	Bingley, : Emerald, 2008
	ISBN	1-280-77108-9 9786613681850 1-84855-197-5
	Descrizione fisica	1 online resource (302 p.)
	Collana	Advances in econometrics, , 0731-9053 ; ; v. 22
	Altri autori (Persone)	FombyThomas B FouqueJean-Pierre SolnaKnut
	Disciplina	330.015195
	Soggetti	Credit derivatives - Mathematical models Credit - Mathematical models Econometrics Risk management - Mathematical models Electronic books.
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references.
	Nota di contenuto	Front Cover; Econometrics and Risk Management; Copyright Page; Contents; List of Contributors; Introduction; Chapter 1. Fast Solution of the Gaussian Copula Model; 1. Introduction; 2. The Synthetic CDO Structure; 3. Valuation Assumptions; 4. The Model; 5. Pricing; 6. A Decomposition; 7. Intrinsic Simplicity of the Intrinsic Value; 8. Time Stability of the Time Value; 9. The Time Value Computation; References; Chapter 2. An Empirical Study of Pricing and Hedging Collateralized Debt Obligation (CDO); 1. Introduction to Collateralized Debt Obligation; 2. Methodology of Pricing CDO 3. Methodology of Calculating Default Delta Sensitivity4. Empirical Results; 5. Conclusions; Note; References; Chapter 3. The Skewed t Distribution for Portfolio Credit Risk; 1. Introduction; 2. Skewed t Distributions and the EM Algorithm; 3. Copulas; 4. Measures of Dependence; 5. Single Name Credit Risk; 6. Portfolio Credit Risk; 7. Pricing of Basket Credit Default Swaps: Elliptical Copulas Versus the

Sommario/riassunto	Covers credit risk and credit derivatives. This book offers several points of view on credit risk when looked at from the perspective of Econometrics and Financial Mathematics. It addresses the challenge of modeling defaults and their correlations, and re
