Pubbl/distr/stampa	Berkeley, : University of California Press, c2007
ISBN	9786612360121 1-282-36012-4 0-520-94122-5
Descrizione fisica	1 online resource (337 p.)
Disciplina	363.6/109794
Soggetti	Water-supply - California - Management Water quality - California Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 291-293) and index.
Nota di contenuto	Frontmatter -- CONTENTS -- ACKNOWLEDGMENTS -- INTRODUCTION -- 1. Los Angeles Area Water Supplies -- 2. Water Management: Who's in Charge? -- 3. Water Use Efficiency -- 4. Drinking Water Quality -- 5. State Policy and the Los Angeles Area -- GLOSSARY -- NATIVE PLANT RESOURCES -- WEBSITES OF INTEREST -- SUGGESTED READINGS -- INDEX
Sommario/riassunto	Water in California is controlled, stored, delivered, and managed within a complex network of interlocking and cooperating districts and agencies. Unraveling and understanding this system is not easy. This book describes how the current system works (or doesn't work) and discusses the issues that face elected officials, water and resource managers, and the general public. Using the Los Angeles area as a microcosm of the state, environmental activist Dorothy Green gathers detailed information on its water systems and applies the lessons learned from this data statewide. A useful primer on watershed and water policy issues, this book provides reasoned, thoughtful, and insightful arguments about sustainability.
