#### Sommario/riassunto

This book brings together a collection of papers that Robert M Stern and his co-authors have written in recent years. The collection addresses a variety of issues pertinent to the global trading system. One group of papers deals with globalization in terms of what the public needs to know about this phenomenon and the role of the World Trade Organization (WTO), whether some countries may be hurt by globalization, how global market integration relates to national sovereignty, and how and whether considerations of fairness are and should be dealt with in the global trading system and WTO negotiation
