Sommario/riassunto

A collection of essays examining the relationship between nature and law, the 'personal' and the 'political'. Some focus on the grey area of what is 'natural'; others on areas thought to be natural rather than socially shaped. A variety of disciplines, particularly philosophy, political science and law, contribute to the debate.

Towards an ethical standard: An analysis of perspectives and experiences in complying with basic ethical requirements -- Chapter 9. The Journey to Explicit Ethics Education for Czech Computer Science Teaching Assistants -- Chapter 10. Countering Education Fraud and Essay Mills through Legal Measures.</p>
Sommario/riassunto	<p>This book provides insights on approaches for enhancing ethical practice, professionalism and integrity for future development in academia and beyond. It does so by offering a thorough review of the background and processes to enhance academic integrity in the years of artificial intelligence. The book also explores the future of research integrity and ethics by examining lessons from the past. Ideas from research findings on how to incorporate an integrity culture in continuously changing secondary and higher education are addressed. The chapters are written by international authors who have been working in the fields of integrity sciences, focussing on ways to enhance ethics and integrity amongst students, academics and institutions (including schools). They identify approaches to deter and detect misconduct and discuss the ways to educate academic integrity amongst academic communities. The book addresses best practices from international institutions and how these can be transformed and adopted in different subject areas. Embracing and managing the use of generative artificial intelligence (GenAI) tools in education are key themes throughout. Special attention is given to the ethical use of GenAI, exploring the ways to minimise the misuses via policies and guidelines.</p>
