Sommario/riassunto	Many different varieties of capitalism have developed in the twentieth century. Despite the rhetoric of globalization, they are continuing to diverge because of significant differences in dominant institutions.

Divergent Capitalisms highlights the major differences between business systems in Europe and Asia and explains why they developed and continue. An invaluable insight for all those interested in international business and organization studies. - ;The late twentieth century has witnessed the establishment of new forms of capitalism in East Asia as well as new market economies in Eastern

comparative perspective / Robert C. Hunt -- Geographical explanations for the distribution of irrigation institutions : cases from Southeast Asia / Willem Wolters -- Water and rice in early Java and Bali / Jan Wisseman Christie -- Contestation over a life-giving force : water rights and conflicts, with special reference to Indonesia / Franz von Benda-Beckmann -- Role of waterborne diseases in Malaysia / Foong Kin -- Privatizing water : the Jakarta concession and the limits of contract / Okke Braadbaart -- Politics of environmental and water pollution in East Java / Anton Lucas and Arief W. Djati.

Sommario/riassunto

Water, in its many guises, has always played a powerful role in shaping Southeast Asian histories, cultures, societies and economies. This volume, the rewritten results of an international workshop, with participants from eight countries, contains thirteen essays, representing a broad range of approaches to the study of Southeast Asia with water as the central theme. As it was exposed to the sea, the region was more accessible to outside political, economic and cultural influences than many landlocked areas. Easy access through sea routes also stimulated trade from an early age. However, the same easy access made Southeast Asia vulnerable to political control by strong outsiders. The sea is, moreover, a source of food, but also of many hazards. At the same time, Southeast Asian societies and cultures are confronted with and permeated by 'water from heaven' in the form of rain, flash floods, irrigation water, water in rivers, brooks and swamps, water-driven power plants, and pumped or piped water, in addition to water as a carrier of sewage and pollution. Finally, the volume deals with the role of water in classification systems, beliefs, myths, illness and healing.
