Autore	Birkeland Janis <1945-, >
Titolo	Design for sustainability : a sourcebook of integrated, eco-logical solutions / Janis Birkeland
Pubbl/distr/stampa	London ; ; Sterling, Va. : , : Earthscan Publications Ltd., , 2002
ISBN	1-4175-2175-9 1-280-47575-7 9786610475759 1-136-56841-7 600-00-0302-1 1-84977-095-6
Descrizione fisica	1 online resource (xiv, 274 p.) : ill
Disciplina	363.7
Soggetti	Ecological engineering Sustainable development Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di bibliografia	Includes bibliographical references (pages 260-263) and index.
Nota di contenuto	section 1. Designing eco-solutions -- section 2. The concepts of growth and waste -- section 3. Industrial, urban and construction ecology -- section 4. Design within complex social systems -- section 5. Permaculture and landscape design -- section 6. Values embodied in and reinforced by design -- section 7. Design for community building and health -- section 8. Productivity, land and transport efficiency -- section 9. Design with less energy, materials and waste -- section 10. Low-impact housing design and materials -- section 11. Construction and environmental regulation -- section 12. Planning and project assessment.
Sommario/riassunto	With radical and innovative design solutions, everyone could be living in buildings and settlements that are more like gardens than cargo containers, and that purify air and water, generate energy, treat sewage and produce food - at lower cost. Birkeland introduces systems design thinking that cuts across academic and professional boundaries and the divide between social and physical sciences to move towards a

transdisciplinary approach to environmental and social problem-solving. This sourcebook is useful for teaching, as each topic within the field of environmental management and social change has pairs of short readings providing diverse perspectives to compare, contrast and debate. Design for Sustainability presents examples of integrated systems design based on ecological principles and concepts and drawn from the foremost designers in the fields of industrial design, materials, housing design, urban planning and transport, landscape and permaculture, and energy and resource management.

Sommario/riassunto

Clinical Parkinsonism and Related Disorders will be an online-only open access journal committed to publishing high quality peer reviewed articles related to clinical aspects of movement disorders which broadly include phenomenology (interesting case/case series/rarities), investigative (for e.g. genetics, imaging), translational (phenotype-

genotype or other) and treatment aspects (clinical guidelines, diagnostic and treatment algorithms). In addition, the journal will encourage the publication of educative material (solicited and unsolicited reviews), clinical-pathological cases, drug trials result, and task force reports related to the field of movement disorders.
