Sommario/riassunto

During his lifetime, George Grant influenced a broad cross-section of Canadians, urging them to think more deeply about matters of social justice and individual responsibility. He wrote on subjects as diverse as technology, abortion, Canadian politics and nationalism, and the war in Vietnam, and was claimed equally by rightist and leftist causes. Now, more than a decade after his death, George Grant's writings continue to stimulate, challenge, and inspire. Grant's legacy includes six books and more than two hundred articles, as well as numerous broadcast transcripts, extensive correspondence, and a wealth of unpublished lectures, essays, and notes. In this volume, Arthur Davis has collected all the important material from the 1950s when Grant did his first teaching and writing at Dalhousie University. Through this projected eight-volume series, Grant's published and unpublished writings, including his complete correspondence, will be brought together for the first time. The texts are annotated, and each volume includes an introduction to the period that it covers. The series will not only make it possible to see the whole pattern of Grant's thought, but will also invite a reconsideration of the nature and importance of his work. George Grant is one of the most important Canadian philosophers of the later twentieth century, and his collected writings are a significant contribution to Canadian political thought and Canadian history.

Sommario/riassunto	This book is an introductory textbook on the design and analysis of algorithms. The author uses a careful selection of a few topics to illustrate the tools for algorithm analysis. Recursive algorithms are illustrated by Quicksort, FFT, fast matrix multiplications, and others. Algorithms associated with the network flow problem are fundamental in many areas of graph connectivity, matching theory, etc. Algorithms in number theory are discussed with some applications to public key encryption. This second edition will differ from the present edition mainly in that solutions to most of the exercises will be included.
