Sommario/riassunto	Recent years have witnessed a resurgence of biological research into the causes of crime, but the origins of this kind of research date back to the late nineteenth century. Here, Richard Wetzell presents the first history of German criminology from Imperial Germany through the Weimar Republic to the end of the Third Reich, a period that provided a unique test case for the perils associated with biological explanations of crime. Drawing on a wealth of primary sources from criminological, legal, and psychiatric literature, Wetzell shows that German biomedical research on crime predominate
